
OGShib

community driven token

launched 02.11.2021

View

We were inspired to create the token by the good old crypto traditions when DOGE was still a puppy and the rugpull was not even a thing. We decided to make a token that would look like a meme coin, but would gradually transform into a full DAO. It might not become as popular as DOGE, but we would like to follow in DOGE's footsteps by creating a strong and like minded community.

Why OGShiba

FAIR LAUNCH

100% of the token goes to public investors. 100% of the total supply was used as liquidity.

ANTI RUG

100% of the initial liquidity is locked.

ANTI WHALE

The maximal balance of each wallet is 0.5% of the total supply. No more whale dumps!

AUTO LIQUIDITY

5% of each transaction gets added automatically to liquidity. The added LP-Token are burned.

DEFLATIONARY

1% of each transaction gets burned.

COMMUNITY DRIVEN

With the renouncement of ownership the community will have full control over the token.

Fee structure
